DETAILED ACTION

*Election/Restrictions*

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, drawn to a method of assembling a storage battery, classified in class 29, subclass 623.1.
- II. Claims 14-19, drawn to an apparatus for constructing storage batteries, classified in class 429, subclass 9.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by hand. The skilled artisan can manually deposit terminal of a battery on a pallet in a first position, move the pallet to a second position and contact terminals with one or more bicells in said second position.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Brenda Chambers on 5/24/04 to request an oral election to the above restriction requirement, but Applicant requested a written restriction.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
